

Joana Monteiro

Joana Monteiro is Senior Clinical Lecturer and Honorary Consultant in Paediatric Dentistry at the University of Sheffield, UK. She leads an anomalies clinic for children with complex dental conditions and a joint specialist clinic for those with metabolic bone diseases, including rare disorders such as osteogenesis imperfecta and X-linked hypophosphataemia. Her PhD research focuses on molar incisor hypomineralisation.

Joana co-founded the UK Clinical Excellence Network for amelogenesis imperfecta and dentinogenesis imperfecta to promote best practice and multidisciplinary collaboration. She has published on paediatric dental anomalies, contributes to international clinical guideline development through the European Academy of Paediatric Dentistry (EAPD) and the International Association of Paediatric Dentistry (IAPD), and serves as Associate Editor for the *European Archives of Paediatric Dentistry*.
